Developed by Dağcan Nural

THE PROBLEM

ONE SYSADMIN, FIVE TOOLS

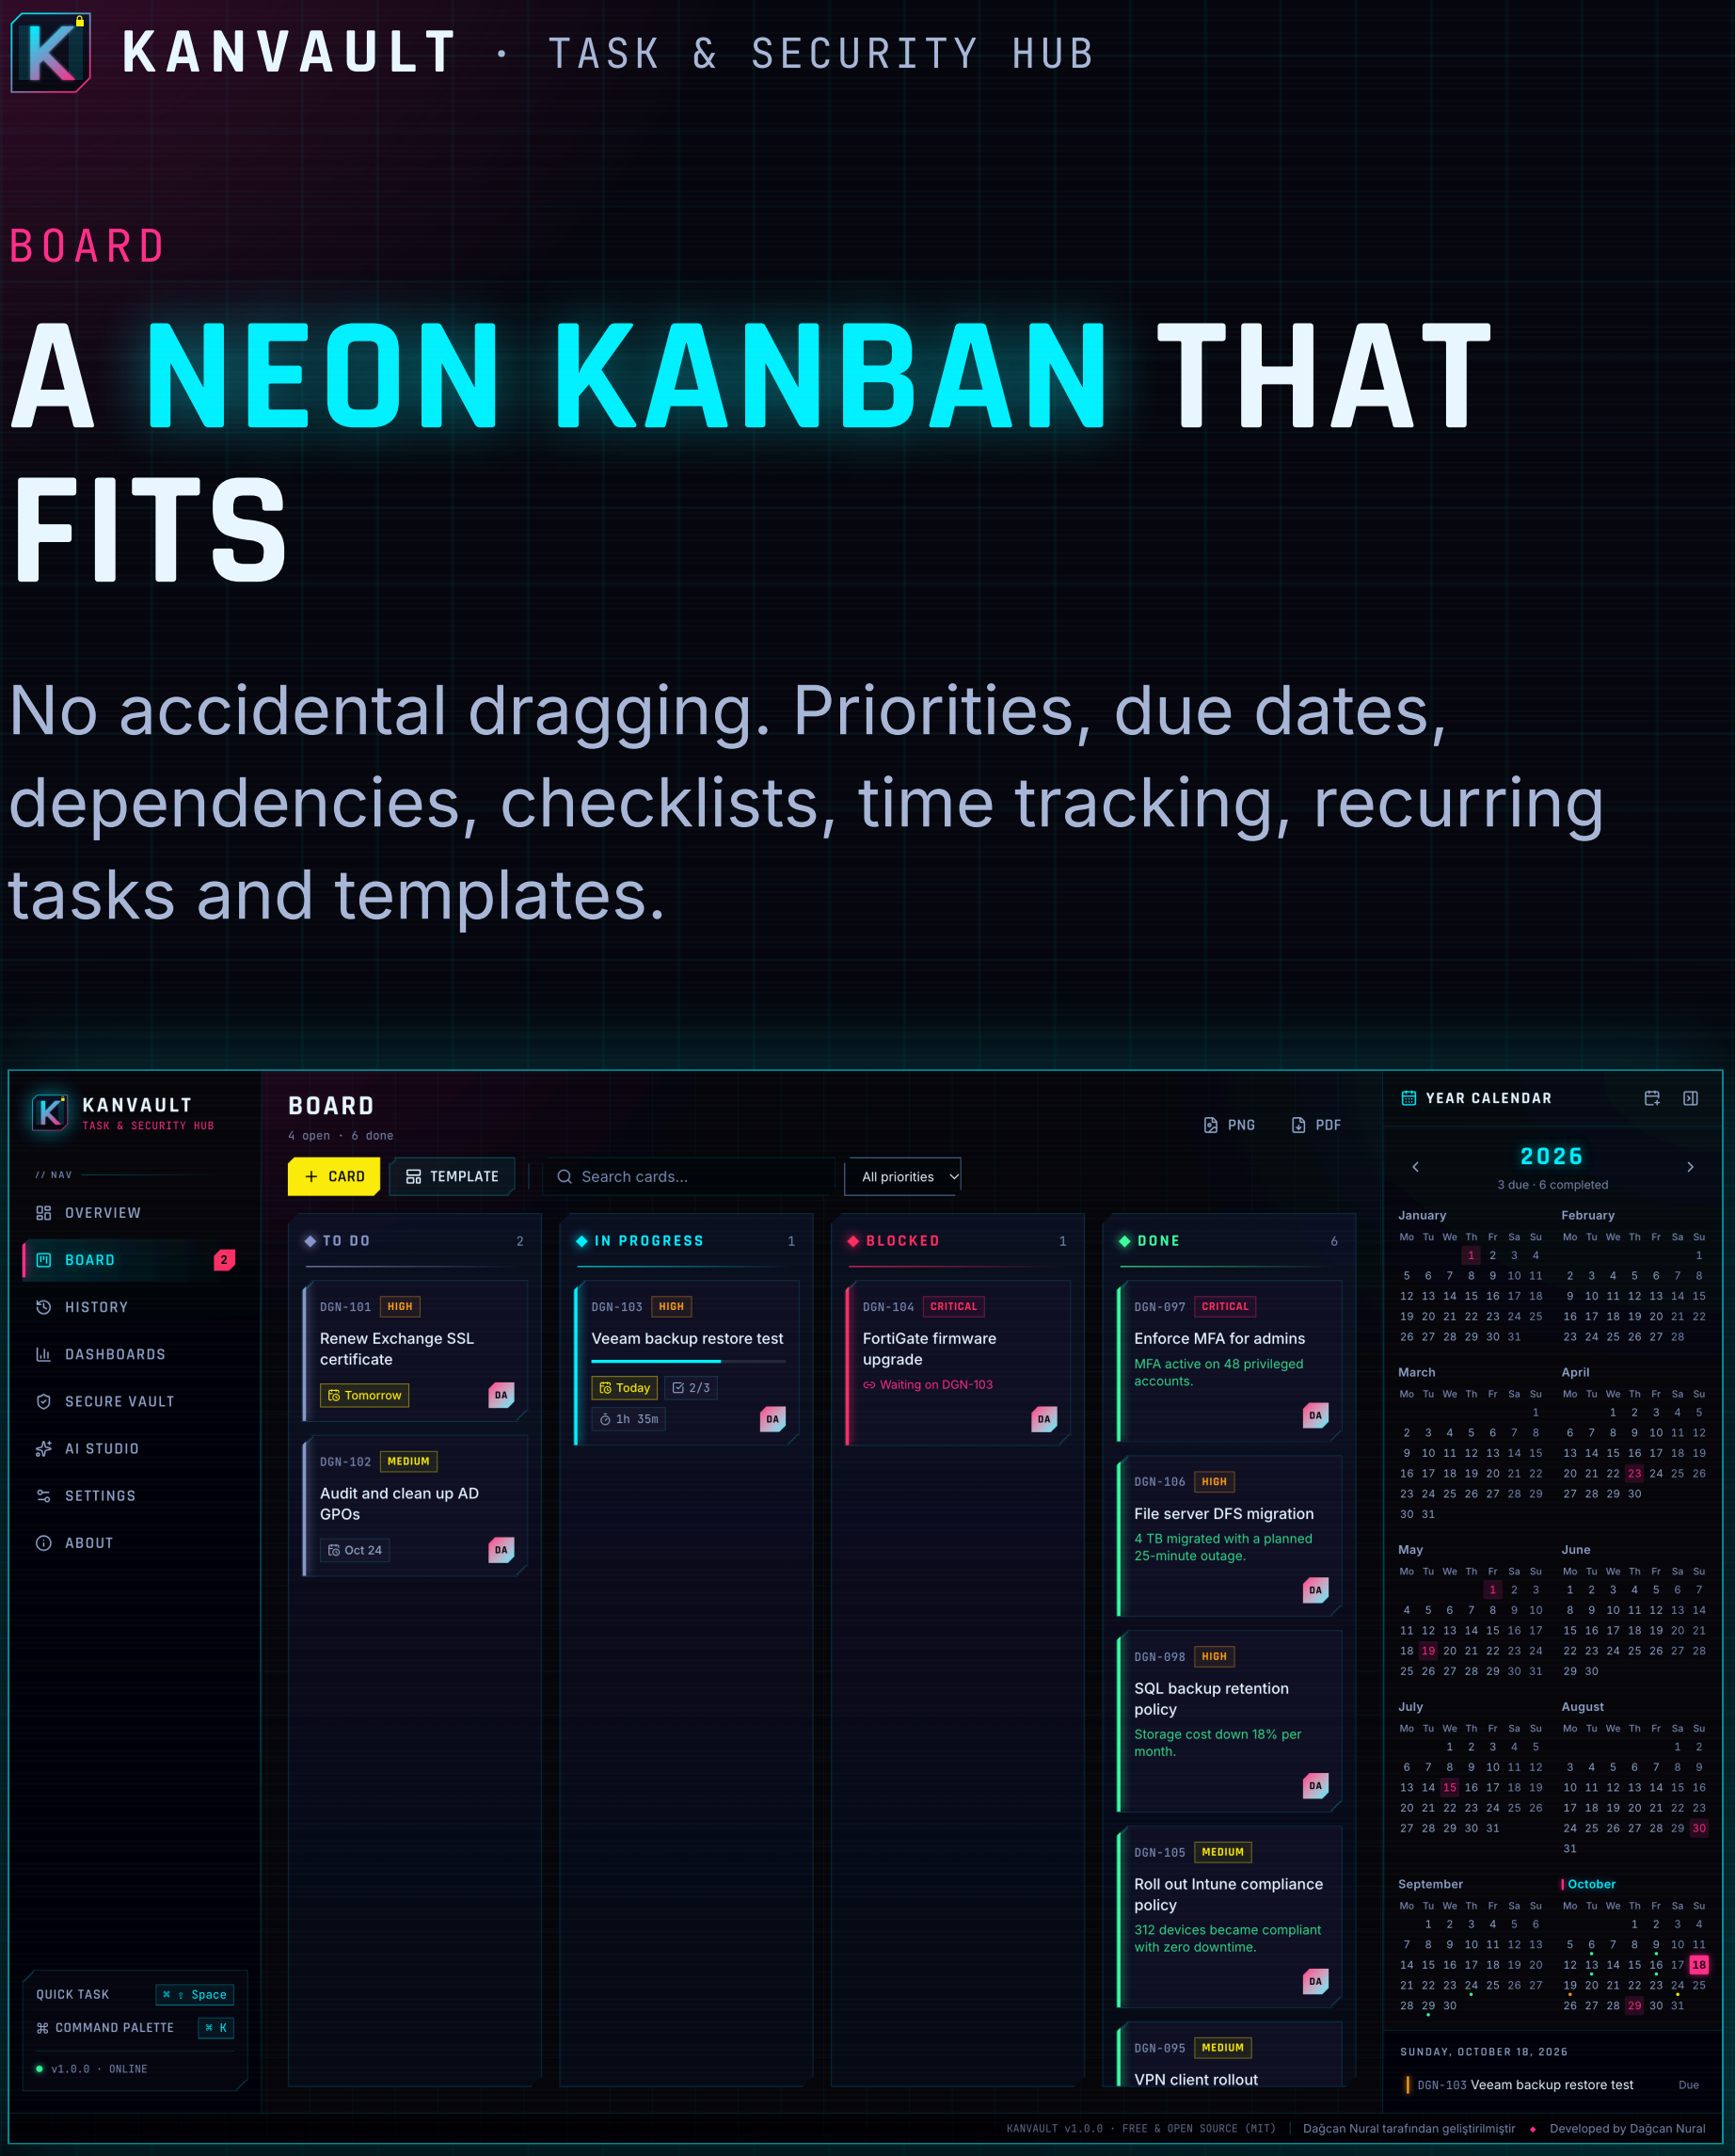

- Tasks in one place, server passwords in another
- PowerShell scripts scattered across the desktop
- The weekly status email always left to the last minute
- No answer to “what did we do last month?”

KANVAULT · TASK & SECURITY HUB

BOARD

A NEON KANBAN THAT FITS

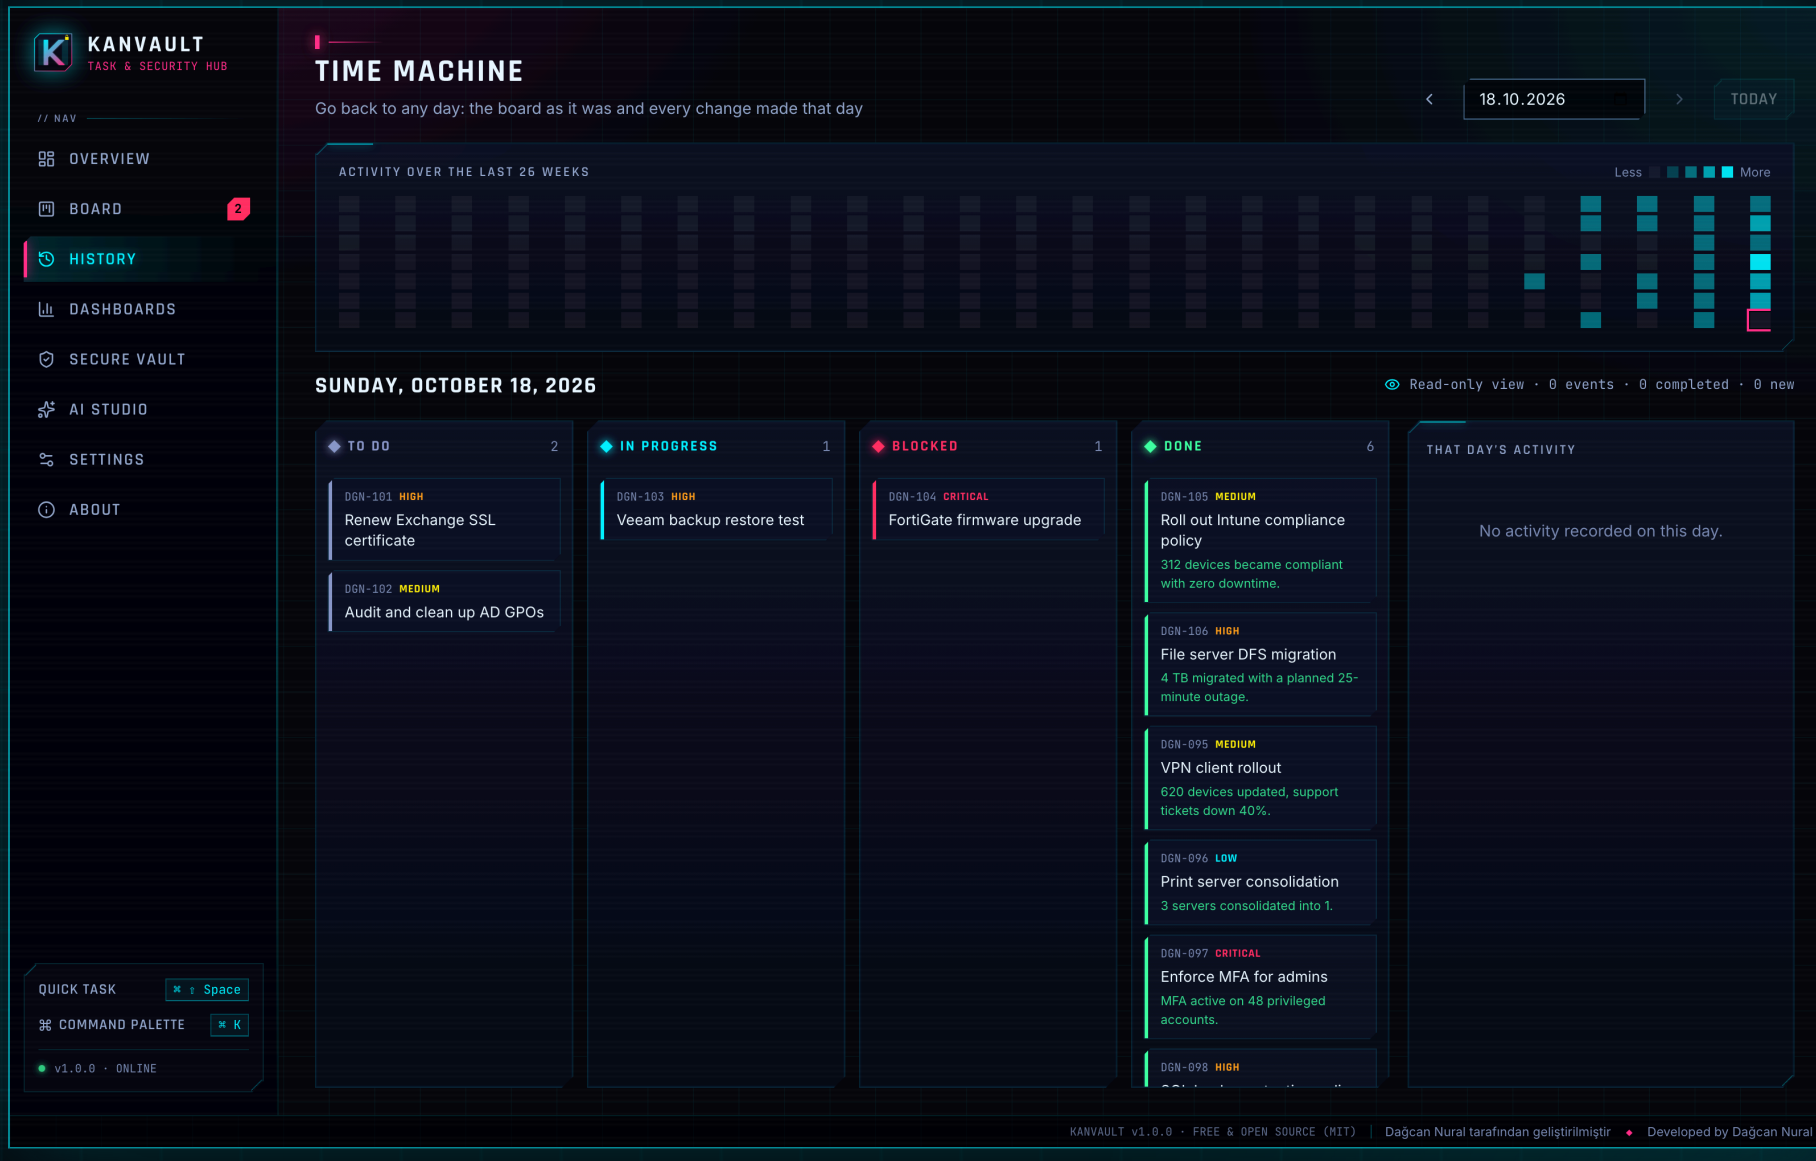

No accidental dragging. Priorities, due dates, dependencies, checklists, time tracking, recurring tasks and templates.

TIME MACHINE

GO BACK TO ANY DAY

Every change is recorded, encrypted. See the board as it was and everything done that day.

KANVAULT · TASK & SECURITY HUB

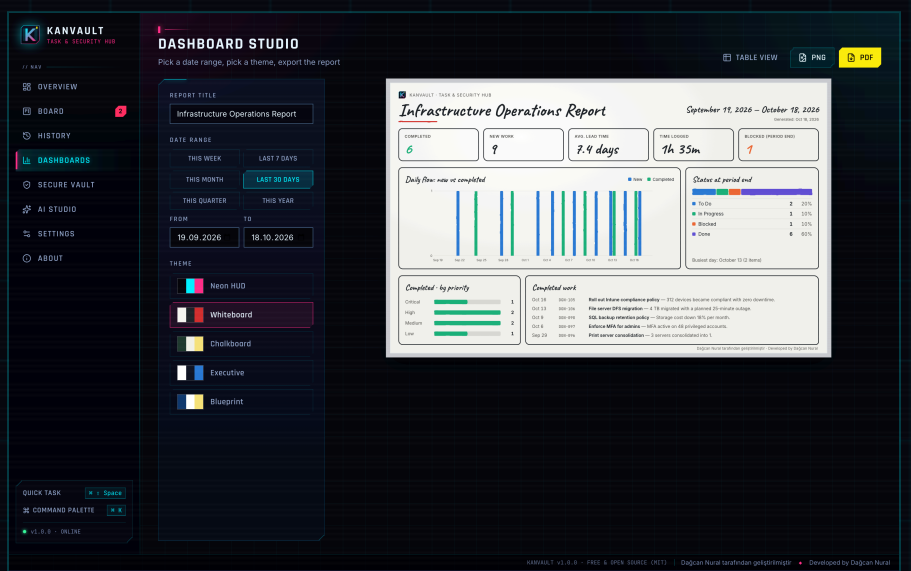

DASHBOARD STUDIO

PICK A RANGE, PICK A THEME

One-click PNG / PDF reports.

NEON HUD

WHITEBOARD

CHALKBOARD

BLUEPRINT

SECURITY

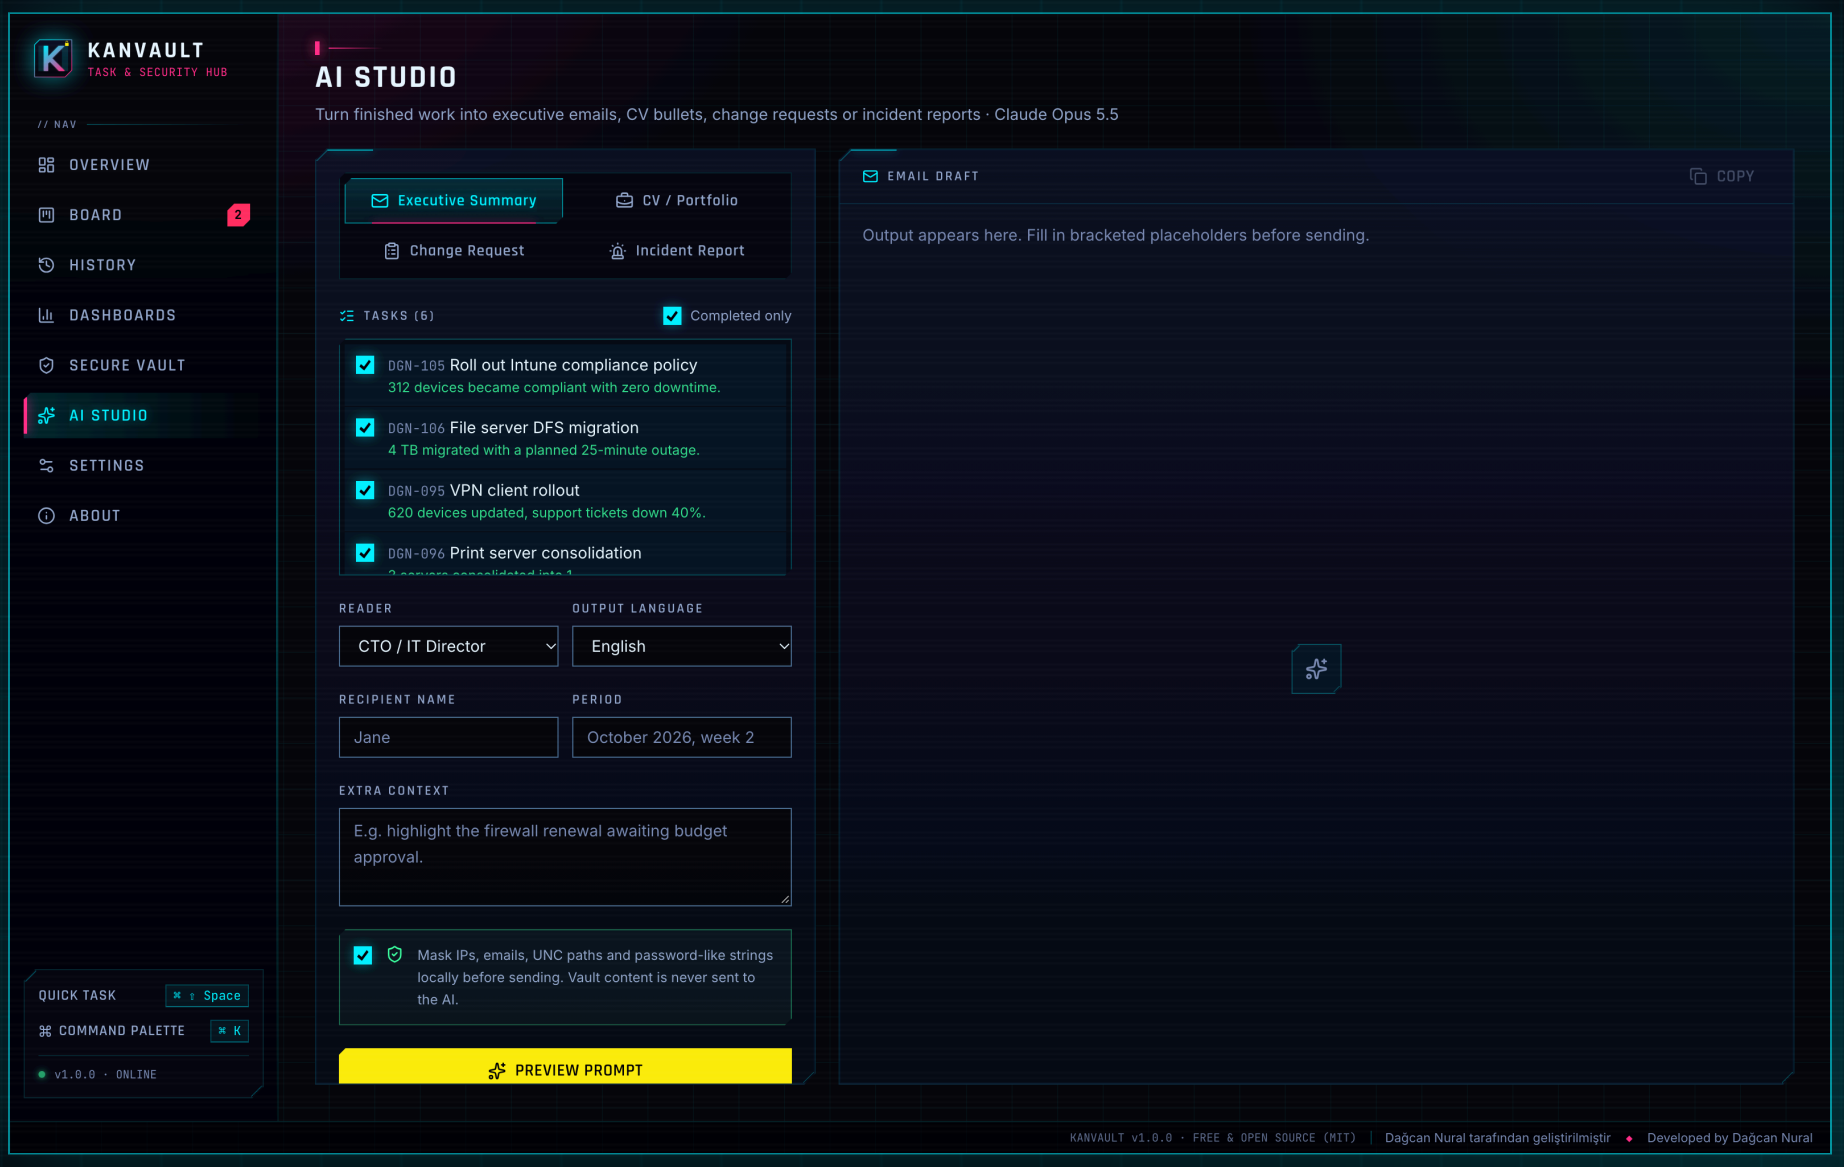

EVEN A STOLEN FILE STAYS UNREADABLE

- Vault: Argon2id + AES-256-GCM, master password never leaves the device
- Board & history encrypted at rest, key in the OS keychain
- Screenshot / recording protection, copy blocking
- Auto-lock, 30-second clipboard clearing, brute-force back-off

AI STUDIO

FINISHED WORK, READY TO SEND

Executive emails, STAR-method CV bullets, change requests and incident reports. Sensitive data is masked on-device first.
